2. Near the western bank of the Swina River, south of Swinoujscie (Swinemuende) there is an old war-time mole (see point No. 1 on the sketch), which was recently rebuilt. On this mole, three cranes, which were formerly lying about, have been erected. Soviet barges tie up here. floats for torpedo training were observed nearby.

3. On shore, there is a large one-storied building, point No. 2, guarded by a Soviet sentry, and near it, immediately near the railway track, a small building, point No. 3. Both buildings look like warehouses. About 300 m. southeast of the smaller building is a newly constructed fuel tank, point No. 4. A wagon loaded with mines was observed near the smaller building, point No. 3. The war heads of the mines with fuse detonators were visible.

4. Further to the northwest of the old mole a new mole is under construction, point No. 5. At the moment poles are being driven into the river bed by means of pile-driving gear.

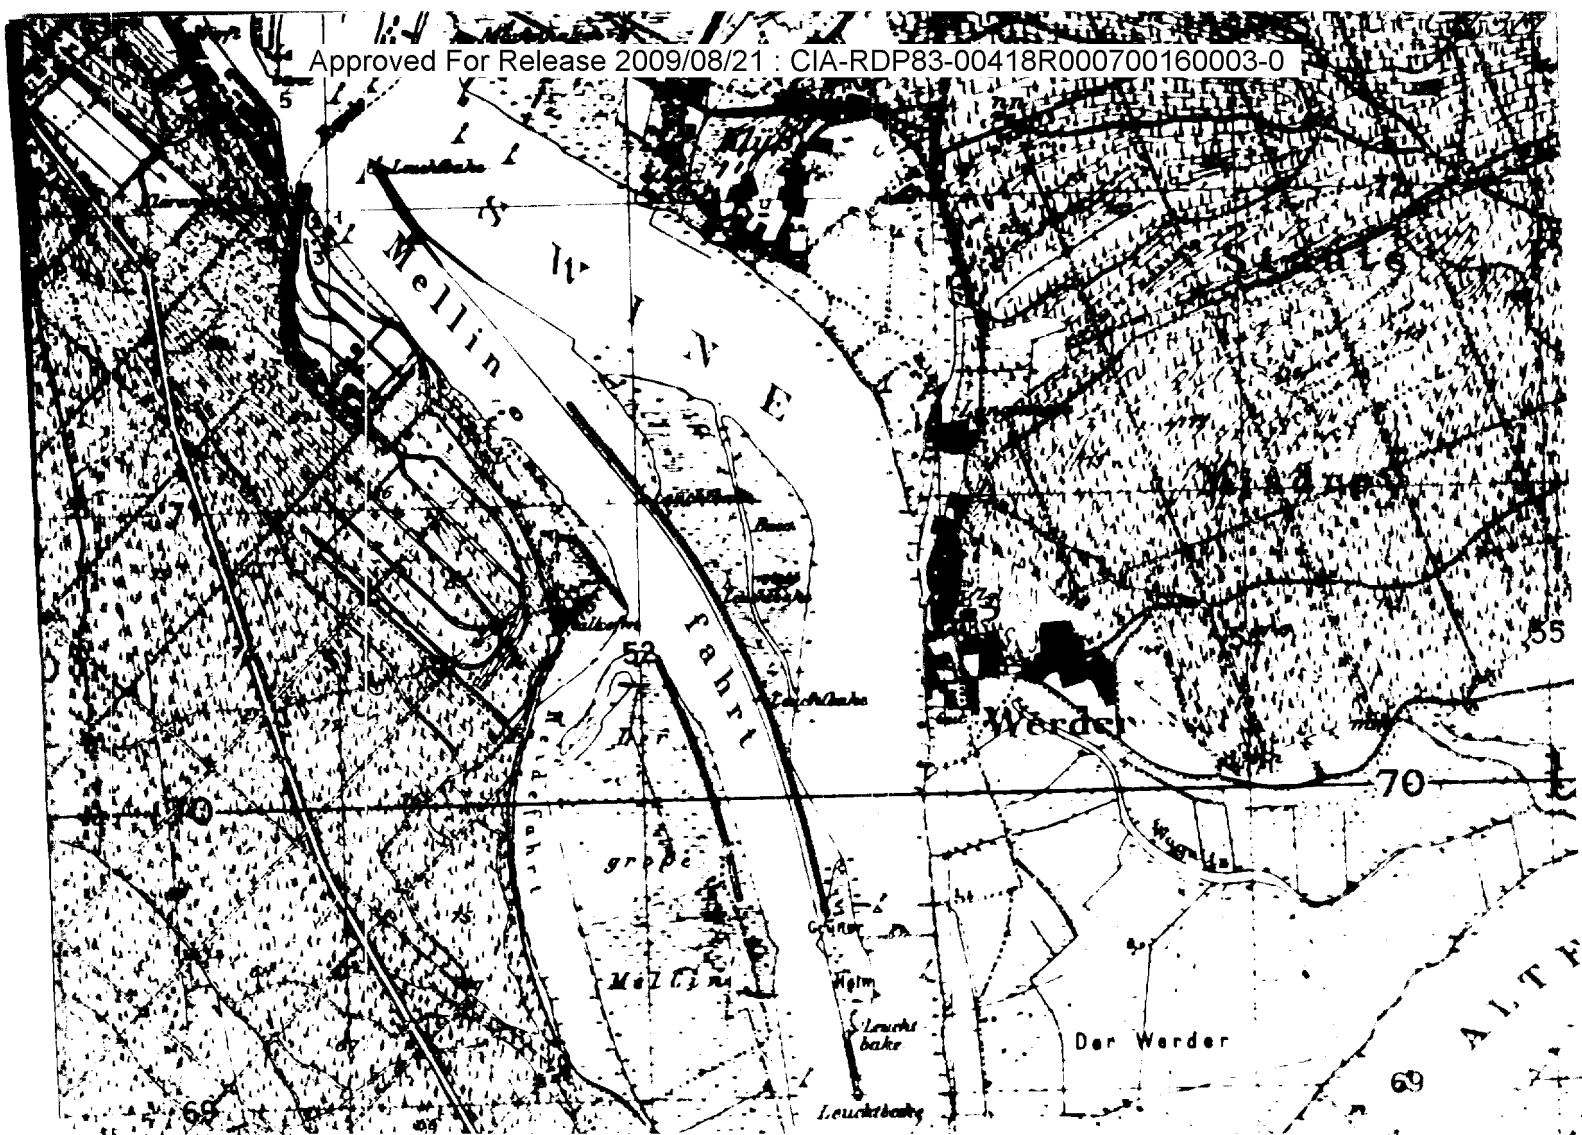

25 YEAR RE-REVIEW
